### Sidoor – Product information AT 18

Dear Sirs,

Because of your feedback concerning the use of AT 18, we have improved its performance considerably. The speed-up cam and the retention force of AT 18 have been increased. This could be achieved by changes as following:

1. **Change of firmware** current version: **V1.32** (since July 2007)
2. **New motor** for doors with weight up to 180 kg

motor **M1** GR63\*55 24V transmission 10:1 is replaced by  
motor **M3** GR63\*55 30V transmission 15:1

The motor **M1** is not available anymore!

Furthermore we offer the motor for doors with weight up to 120 kg:  
motor **M2** GR48\*50 24V transmission 15:1

The AT 18 control with the above-mentioned version of firmware **V1.32** recognizes automatically each of these 3 motors (**M1**, **M2**, **M3**)!

The AT 18 control with an old version of firmware does not recognize the newly introduced motor M3. Therefore a firmware update is necessary!

In case of malfunction during a required change of motor, this is especially needed!

If you have further questions, please do not hesitate to contact us.

We are looking forward to continuation of our business relationship.

Yours sincerely,

**Siemens AG**
