

IBC's 2nd International Conference: 1st Time in Europe

Process Analytical Technologies for Biologics

5 - 6 October 2005, Corinthia Alfa Hotel, Lisbon, Portugal

www.abc-lifesci.com/pat

With FDA guidelines introducing the PAT initiative, thus encouraging pharma and biotech manufacturers to implement PAT and reduce time and costs on the production line, there has never been a greater time to receive a full insight on what implications these procedures have for your organisation.

This conference will provide you with a succinct action plan that allows you to develop a clearly defined strategy on when and where to develop Process Analytical Technology.

SIEMENS

Clients and colleagues of Siemens are invited to attend Process Analytical Technologies for Biologics and take advantage of the following offer.

»» **25% discount** on delegate bookings ««
