

# A responsible team for a valuable resource.

Accurate measurement and intelligent information processing  
with SITRANS F flowmeter solutions.

## SITRANS F

Water is a scarce and valuable resource that needs to be efficiently measured and monitored. That's why we have designed flowmeters specifically for the water industry. Long lasting performance, accurate measurement, a robust construction, and intelligent information processing are attributes that make our flowmeters your best choice. With the Sensor Systems portfolio, you lose less and keep more in the water industry. More information: [www.siemens.com/flow](http://www.siemens.com/flow)  
**Setting standards with Totally Integrated Automation.**

Answers for industry.
