

The right ingredients ...

... for approved hygienic performance in food & beverage with SITRANS F.

Sensor Systems

Within our broad range of flowmeters, we have product offerings specifically designed for the food & beverage industry offering unique and flexible process connections. Our products have passed the EHEDG and 3A hygienic test and meet all sanitary standards. Their performance is unaffected by suspended solids, viscosity, and temperature challenges making them your best bet in this industry with extreme hygienic requirements.
