

Hot stuff for coolest measuring and sensing.

Precise temperature measurement in every situation
with SITRANS T transmitters.

SITRANS T

The SITRANS T family can meet your every demand when it comes to temperature transmitters and sensors – even if your application involves high temperatures, high pressure, or aggressive media. For many processes, continuous and precise temperature measurement is essential to guaranteeing product quality and a fault-free process sequence. With the SITRANS T family, part of our process instrumentation portfolio, Siemens offers a comprehensive range of sensors, transmitters, and complete measuring points for different applications – they provide high precision and reliability and are intrinsically safe.
