TIA Portal course

2 days

Project Work and Commissioning of Industrie 4.0 System with Application Examples for Different IEC 61131 Programming Languages

Prerequisites

- Basic knowledge of Windows PC
- Basic knowledge of control engineering/STEP 7

Objective

- In this course, the participant is given a project task that has to be implemented on the basis of a given automation system. A systematic procedure and programming in line with Industrie 4.0 is specified and many practical tips and tricks are given.
- Industrial programming examples with LAD/FBD, SCL and GRAPH are presented.

Contents

- To be individually coordinated with the system of the customer or the systems used elsewhere

Note:

These Learn-/Training Documents are available in the SCE Internet:
